

Don't let ultrasound imaging be a pain...

See how easy it can be with the
Terason t3200™ Ultrasound System
designed specifically for
musculoskeletal applications.

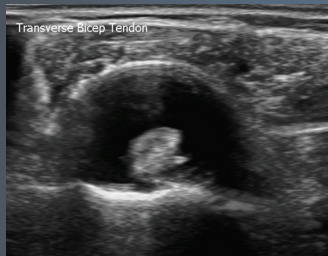

Terason t3200* MSK Series

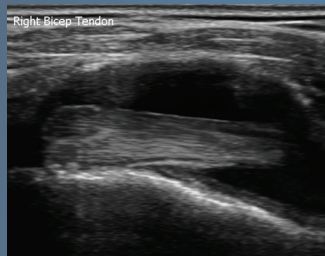

Revolutionizing ultrasound for MSK

Terason takes the pain out of imaging with the next wave of advancements and flexibility in ultrasound

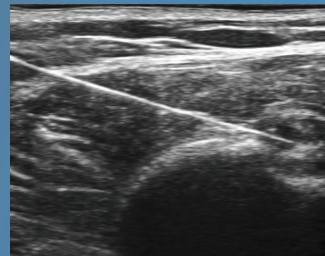

- Enhanced image quality and clarity of bony landmarks, muscles, tendons, ligaments, joints and soft tissue in both superficial and deep structures
- OmniBeam increases spatial detail and accuracy of curved surfaces
- TeraVision's latest-generation image processing provides refined texture and detail

Transverse Bicep Tendon

Right Bicep Tendon

Needle injection in shoulder

15L4 Linear Array

6C1 Curved Array

16HL7 Linear Array

State-of-the-art transducer technology provides higher frequency imaging across a full range of depths

Seamless MSK-specific exam protocols

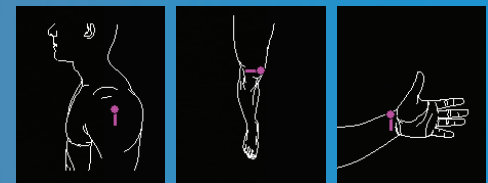

- Exam-specific tools right at your fingertips
- Quicker and easier documentation
- EZ-Viewer simplifies review of studies for referring physicians and patients

Integration into your busy practice made easy

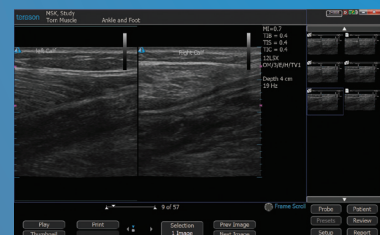

Streamline your workflow and leverage laptop computer versatility with the battery-operated t3200 system.

- Built-in 1000Mbps Ethernet
- 802.11n wireless
- DICOM 3.0
- VGA, and DVI display capable
- Integrated CD/DVD
- USB 2.0
- Open PC architecture

An affordable investment in a Terason system is protected for years to come with fast, responsive remote support, full-coverage warranties, and a comprehensive upgrade path.

Body markers appear on screen to identify currently selected exam type

Split-screen facilitates quick identification of problem areas
